INGLISH AND CHINESE. DICTIONARY. WITH THE PUSTCAND MANDARIN PRONUNCTATEOR: n Auglo-Chinese Dictionary, published at the Daily Press Office. Hongkong. For comprehensiveness and practical service Work stands unrivalled. All the new

vords which the Chinese have of latey ears been compelled to coin to express the numerous obects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extenso. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Panti pronunciations are given he accents being carefully marked on the best principle hitherto attained. The typography sisplays the success of an attempt to make the hinese and English type correspond in the size of body, thereby effecting a vast economy of nace achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore charac-

terized Chinese publications. To illustrate the vast scope of the work the ollowing facts are submitted for consideration:---Chalmers' Vecabulary contains about 16,000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of 600,000 Chinese charactors. Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely renuires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples this work contains more than five times as

many as any other Dictionary hitheric pub-For practical purposes the arrangement of he work is so complete, that a reference to its pages enablés a person who understands English to communicate effectively with natives who understand nothing but Chinese. In this respecthe work will be found indispensable to all Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. o parties resident in England and interested
